1. Here is the Original Symbols List (Actual Size) sent from the factory.

2. I had to create symbols from these tiny photos by blowing them up and enhancing the image.

3. The container labels are as clear as I could make them.

4. Because there are 120 colors, the factory had to invent new symbols & in solving that issue, they repeated 2 symbols differentiated by a different colored background which does not visually translate on the printed paper symbols. I also feel the lower-case y could be confusing, so I included this symbol solution as well.

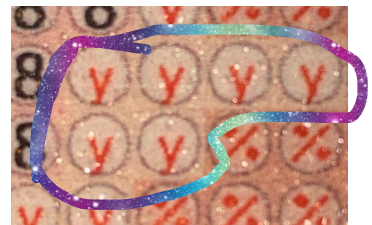

Use these visuals to help:

DMC Salmon VRY DK

DMC Plum Light

Please let me know if there are any other symbols you struggle with and I will make a fix.
